Allowance of Application # 09/776,260

1. The following communication is in response to applicant's Amendment and Terminal Disclaimer received 9-January-2006.

Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the invention described in the Schuller et al. published U.S. Application No. 2001/0047250, the improvement comprising a method for producing a colour recommendation for a structure or part of a structure to be painted, wherein an archetype image that closely matches the structure to be painted is selected from a first database; a color or colours are selected from a second database by a user and are applied to the image to produce a colour scheme; whereby the structure or part of a structure is displayed with the colour applied, and information from which paint corresponding to the colour or colours in the scheme is identified. This patentable distinction is included in each of the independent claims, nos. 14 and 31. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <generation of a colour recommendation for a structure or part of a structure to be painted> having the corresponding structure which is disclosed in the specification and equivalents thereof, and Figure 1. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
